

**VEIN-RELATED ALTERATION**

- Stage I (K-silicate)
  - K-feldspar-quartz veins in intrusive rocks
  - quartz-sulfide veins in volcanic rocks
- Stage II (Quartz-Sericite-Chlorite)
  - quartz-sericite veins in intrusive rocks and feldspathic sandstone
  - quartz-chlorite veins in volcanic rocks
- Stage I and Stage II Veins
- ◐ Epidote-Quartz Veins

Alteration mapped at the surface

- ◐ Stage I (K-silicate) veins
- ◑ Stage II (quartz-sericite-chlorite) veins
- ▨ Propylitized biotite rhyodacite porphyry dikes
