MEMORANDUM

To: Wil Forsberg

From: Kenneth L. Cook

Subject: Transmittal of gravity data to you for the project:  
"Gravity data in the Wasatch Front, Utah, area" K. L. Cook  
Co-Principal Investigator.

A. Attached herewith, for your transmittal to the Utah Geological and Mineral Survey (UGMS) (after prior approval by Duncan Foley, Co-Principal Investigator) is one copy of the following for the UGMS and one copy for your files.

1. Phase I: Jordan Valley area

Notes: a. The required material for this project to date was already submitted by you to the UGMS prior to the deadline of mid-April, 1980 (for 1) the listing of the principal facts of the gravity stations -- which also included the terrain corrections -- for the Jordan Valley area and 2) the work-sheet complete Bouguer gravity anomaly map, with a contour interval of 2 milligals). ✓

b. Therefore, no more data are now required to be submitted to the UGMS on Jordan Valley. ✓

c. However, it should be emphasized that the UGMS is expected to submit any new gravity data for the Jordan Valley area to me by August 1, 1980. Also I have informally requested to Wally Gwynn and Pete Murphy that these new gravity data be tied to the University of Utah gravity base station; \*and they have assured me that this will be done. ✓

2. Phase II: Utah Valley area

1. List of principal facts of gravity stations, including terrain corrections out to 100 miles (167.7 km). ✓

2. The following maps, plotted by the computer, with an "x" showing gravity station locations, at a scale of 1:62,500: ✓

a. 2 maps with designation of station numbers only.

Calculating  
plotting

\* and should be submitted on IBM computer cards.

- b. 2 maps with complete Bouguer gravity anomaly values only. *ok*

Note: Two maps of contiguous areas were required for the Utah Valley area at the required scale of 1:62,500.

3. Phase III: Northern Wasatch Front area

1. List of principal facts of the gravity stations, including terrain corrections out to 100 miles (167.7 km).
2. The following maps showing gravity station locations, at a scale of 1:62,500 (plotted by the computer):
  - a. Map with the designation of station numbers only.
  - b. Map with the complete Bouguer gravity anomaly values only.

B. Attached herewith, for your transmittal to the Earth Science Laboratory Division (to the attention of Howard Ross) is one copy of the following:

- Combined into 1 map* →
1. East one-quarter of the Tooele Utah 1°x2° quadrangle.
    - a. List of principal facts of the gravity stations, including terrain corrections out to 100 miles (166.7 km).
    - b. The following maps, plotted by the computer, with an "x" showing gravity station locations, at a scale of 1:62,500:
      - (1) Map with designation of station numbers only.
      - (2) Map with the complete Bouguer gravity anomaly values only.
  2. East one-quarter of the Delta, Utah 1°x2° quadrangle.
    - a. List of principal facts of the gravity stations, including terrain corrections out to 100 miles (166.7 km).
    - b. The following maps, plotted by the computer, with an "x" showing gravity station locations, at a scale of 1:62,500:
      - (1) Map with designation of station numbers only.
      - (2) Map with complete Bouguer gravity anomaly values only.

Memo

March 7, 1980

①

To: Howard Ross

Re: Open filing of principal facts of gravity data -- DOE funds.

Cooperative project: ESL, UGMS, & U. of Utah - G.G. Delt.

Tentative plans -

I. Phase I -- Jordan Valley -- March 1980 -- (UGMS interested)

A. Field work -- optional but desirable

Tie several base stations together - 1-2 days work only

B. Office work -- Surfa & Cook

Computer

NO terrain corrections

(by mid-April)<sup>#</sup> Station locations + gravity values (simple Bouguer gravity values)

II. Phase II -- Wasatch Front -- April + 1st part of May 1980

continued:  
(scale: 62,500)

A. Areas:

1) Utah Valley -- UGMS interested

2) Jacob Valley -- Cook "

3) From Salt Lake School to Idaho state line -- UGMS interested

B. Field work

Tie several base stations together - 1-2 days work only.

C. Office work -- Surfa & Cook

Computer

NO terrain corrections.

III. Phase III -- E  $\frac{1}{4}$  of 1° x 2° sheets -- Delta, Tooele, Utah -- May + early June

A. Office work -- Surfa & Cook

B. NO terrain corrections

IV. Phase IV -- June 1980 -- Surfa & Cook

A. Terrain corrections of all of above data.

B. Complete (terrain-corrected) Bouguer gravity anomaly map - to be published by UGMS

# Assumes Surfa full-time DOE during March 10-31, 1980

MEMORANDUM

To: Wil Forsberg

*April 21, 1980*

From: Kenneth L. Cook

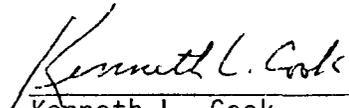

Subject: Submittal to UGMS of information concerning terrain corrections

In the research proposal dated March 21, 1980 to the Utah Geological and Mineral Survey entitled "Gravity data in the Wasatch Front area, Utah," (K.L. Cook and D. Foley, as P.I.'s) it was agreed to submit to them by May 1, 1980 the following information:

The radial distances to which the terrain corrections (if any) have been made for the stations in each of the surveys," (see footnotes to Tables 2 and 3 on the original proposal pages 9 and 12, respectively).

Attached herewith is the desired information, which is in the form of updated and amended copies of Tables 1, 2, and 3, which appeared on the original proposal on pages 6,9, and 12, respectively.

Please transmit the information to the UGMS.

  
Kenneth L. Cook.

*CC: Laura Serpa*

Table 1 --- Approximate number of stations in Jordan Valley area.

<u>Name</u>	<u>Area Designation</u>	<u>Approximate No. of Stations</u>

Total		1,040

- 1/ Terrain corrections out to a radial distance of 100 miles (167 km) from each station, using a computer.
- 2/ Terrain corrections out to a radial distance of generally 6.1 miles.
- 3/ Terrain corrections out to a radial distance of 100 miles (167 km) from each station, using a computer.

Note: For all terrain corrections made, a density of 2.67 gm/cc was used.

Listing of gravity data in Utah Valley area, Utah

All of the stations listed on the following pages have been tied to the gravity base station network in Utah (Cook et al., 1967). Because the various surveys were conducted over several years and with different instruments, the accuracy of the various surveys will vary.

The following is a listing of the station prefixes used in this listing and the source of these gravity values. Where possible the estimated accuracy is also given.

<u>Prefix</u>	<u>Taken by</u>	<u>Accuracy</u>
