Phone conversation with Cliff Walkey, 7-8-88  
(prob. in next 2 weeks)

- Meeting with the BIM this month to reach agreement on Plugging and Abandoning N-3
- Definitely plan on proceeding this year (probably later on in the fall)
- After this meeting-plans to start soliciting for contractors
- Geo operator is planning on obtaining a fluid sample and wants UURI involvement
- It seems likely there will be a rig on site during plug + abandonment,
