Mr. Howard Ross
Section Head/Applied Geophysics
University of Utah Research Institute
391 Chipeta Way, Suite C
Salt Lake City, Utah 84108-1295

Dear Howard:

As we discussed on the phone today please find attached the following information on the Carson Lake prospect.

1. An April 19, 1990 report I wrote. All that is missing from this copy is the land discussion and the maps. You should already have most of the maps. I'm sure you will find my treatment of the gravity and aeromag quite cursury.
2. An August 1987 NWC report by Katzenstein and Bjornstad. This is not a good copy but the original I have is also in poor condition.
3. UNOCAL 72-7 lithologic log.
4. Lithologic information from the CL series of shallow holes drilled by Oxbow in 1989 and 1990.
5. Temperature profiles from the CL holes.

I do not have the lithologic information from the 1973 Phillips holes.

This more or less completes the transfer of significant information from Oxbow to UURI on the Carson Lake prospect. I hope the rather slow transfer results in an interpretation which is largely independent of my biases.

Good luck

Dick Benoit
