

The Geological Survey is making a series of standard topographic maps to cover the United States, Puerto Rico, Guam, American Samoa, and the Virgin Islands. Under the plan adopted, the unit of survey is a quadrangle bounded by parallels of latitude and meridians of longitude. Quadrangles covering 7 1/2 minutes of latitude and longitude are published at the scale of 1:24,000 (1 inch=2,000 feet). Quadrangles covering 15 minutes of latitude and longitude are published at the scale of 1:62,500 (1 inch=approximately 1 mile). A few special maps are published at other scales, as listed in this index under special headings. Each quadrangle is designated by the name of a city, town, or prominent natural feature within it, and on the margins of the map are printed the names of adjoining published quadrangle maps. The maps are printed in five colors. The man-made features and names are printed in black; water features and names are blue; road classifications, urban areas, and U. S. land lines are red; woodland areas are shown in green; and contour lines and values are printed in brown. The contour interval differs with the scale of the map and the relief of the area mapped. On published maps the areas of change are shown in purple. A booklet describing topographic maps and symbols is available free upon request. The extent of map coverage is shown on the index map, on which the mapped areas are outlined in black. Quadrangles for which published maps are available have the quadrangle name, publishing agency (if other than the Geological Survey), and the date or dates of survey also printed in black. A list of special maps and sheets is given on the following pages. Further information concerning maps may be obtained from the National Cartographic Information Center, Geological Survey, 507 National Center, Reston, Virginia 22092.

at different scales. Where this occurs, it is especially important that the map order include the series designation, such as 7 1/2-minute, 15-minute, or 1:250,000. The Geological Survey does not supply mounted maps. An order form is included with each index, but maps may be ordered without a form. The name, address, and ZIP code of the purchaser should be typed or printed on all orders, and the maps desired should be listed alphabetically. MAP PRICES AND SHIPMENT. Standard quadrangle maps published in the 7 1/2- or 15-minute series are priced at \$1.25 a copy. Prices of other maps listed in this index are indicated in the descriptive text. On an order amounting to \$300 or more at the list price, 30% discount is allowed. No other discount is applicable. Prepayment is required and must accompany each order. Payment may be made by money order or check payable to the Geological Survey. Prices include surface transportation for shipments within the 50 States, to United States possessions, and to Canada and Mexico. If special transportation is requested, the entire cost must be paid by the purchaser. For shipments to other countries by surface transportation, a surcharge of 25% of the net amount of the order must be included in the payment. At the purchaser's request, maps will be shipped by air. The entire cost of such transportation must be included in the payment, but the 25% surcharge is waived. WHERE TO ORDER MAPS. Maps of areas east of the Mississippi River, including Minnesota, Puerto Rico and the Virgin Islands of the United States should be ordered from the Branch of Distribution, U. S. Geological Survey, 1200 South Eads Street, Arlington, Virginia 22202. Maps of areas west of the Mississippi River, including Alaska, Hawaii, Louisiana, American Samoa, and Guam should be ordered from the Branch of Distribution, U. S. Geological Survey, Box 25286 Federal Center, Denver, Colorado 80225.
