

**EXPLANATION**

- △ HVO Stations
- \* Deep geothermal wells
- Epicenters (Suyenaga and Furumoto, 1978). Events observed by HVO, 1964-1973,  $m > 2.5$  and well determined smaller ones.
- Malama - Ki array (Suyenaga and Furumoto, 1978)
- 3 Microearthquake epicenter with depth in km. indicated by number (Suyenaga and Furumoto, 1978).
- 3 Microearthquake density, Opikikao Anomaly (Mattice and Furumoto, 1978). Contour number is number of earthquakes per sq. km. for 15 days between 3/23/78 and 4/20/78.
- ◇ 2 Seismometers for above survey.
