

**EARTH SCIENCE LABORATORY**  
UNIVERSITY OF UTAH RESEARCH INSTITUTE

- EXPLANATION**
- Outline of magnetic source body
  - $K$ : apparent susceptibility contrast,  $\mu\text{gs}$  units
  - $d$ : depth to top of magnetic source, meters
  - $w/2$ : coordinate center for magnetic model (Plates IIIa, IIIb, IIIc)
  - Area of very low susceptibility
  - Interpreted fault or fault zone
  - ? where less certain
  - MS-12 In situ magnetic susceptibility sample site
