 Earth Science Laboratory
 420 Chipeta Way, Suite 120
 Salt Lake City, Utah 84108

Dear Debbie:

The following is a priority list of thermal features on Forest Service or Bureau of Land Management ground; Potosi was moved from fifth to seventh place as I am certain it is on patented ground (this problem may exist at other locations):

1. Marysville (BLM well)
2. Sleeping Child (USFS)
3. Granite-Lolo (USFS)
4. Medicine (USFS)
5. LaDuke (USFS)
6. Quinns (USFS)
7. Potosi (USFS)
8. Elkhorn (USFS)

I hope that this helps; upon receipt of the worksheets, they will be filled out and returned.

Sincerely,

John L. Sonderegger
 Hydrogeologist
