

GEOHERMAL BRANCH

INTER-OFFICE MEMORANDUM

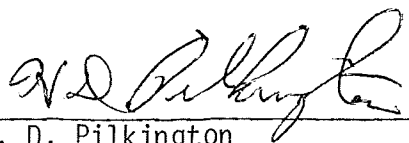

SUBJECT: K/Ar Data Dike Rock at Twin Buttes
Deeth Area, Nevada

DATE: August 17, 1981

TO: J. E. Deymonaz, H. J. Olson

FROM: H. D. Pilkington

The K/Ar data on biotite from the dike rock in the saddle between the Twin Buttes is 40.1 ± 2.0 m.y. (analysis attached). I do not see any reason for collecting a sample from the dikes at the southern end since they are probably of the same general age.

H. D. Pilkington
