

CHEMICAL ANALYSES OF THERMAL SPRINGS AND WELLS IN OREGON

OPEN FILE REPORT O-79-3

Compiled by

U.S. Geological Survey

and

Oregon Department of Geology and Mineral Industries

1979

INTRODUCTION

Chemical analyses contained in this report were derived from specific samples collected of water, condensate, or gas from thermal surface springs or wells in Oregon. This information is the result of sampling by numerous individuals and agencies and reported on for this compilation by the U.S. Geological Survey and/or the Oregon Department of Geology and Mineral Industries.

The information presented is included in the Geothermal Resource Computer File (GEOTHERM). This file is stored on disk devices connected with the U.S. Geological Survey's 370-155 computer at Reston, Virginia.

Specific conductance is reported in $\mu\text{mhos/cm}$. Alkalinity is reported in either ppm or mg/l as CaCO_3 . Solute analyses as well as total dissolved solids are reported in either ppm or mg/l as noted. Water temperatures are Celsius ($^{\circ}\text{C}$).

The first 144 records (T-2) are shown in a different format than the remainder (T-5). Pages for T-2 are numbered from 1 to 139; pages for T-5 are numbered from 1 to 30. Even though the two formats share identical page numbers, chemical analyses have not been repeated.

Counties are listed alphabetically for each format and localities are treated similarly. Some springs may have more than one locality, and this is reflected on the data sheets.

This report will be updated from time to time by the acquisition of additional water chemistry data as obtained from newly identified thermal surface and well sources.

 COLLECTION DATE..... 1955/01/21
 SAMPLE TEMPERATURE..... 25.
 DISCHARGE OF WELL OR SPRING.. 1060.
 DISCHARGE UNITS..... LPM
 DEPTH OF WELL..... 437.
 PERTINENT LITHOLOGY..... BASALT AND TUFF IN ALTERNATING LAYERS
 REFERENCE..... HAMPTON AND BROWN, 1964
 WATER ANALYST(S)..... OREGON STATE BOARD OF HEALTH
 PH..... 7.9
 UNITS USED FOR ANALYSIS..... PPM
 ALKALINITY..... 63.
 ALKALINITY MEASURED AS..... HCO3
 SiO2..... 72.

NA.....	30.
K.....	5.
CA.....	4.8
MG.....	1.3
F.....	0.5
CL.....	2.1
504.....	4.8
