

Energy & Geoscience Institute

June 29, 2004

Ms. Mary Hartford, Contracting Officer,
DOE Golden Field Office

Dear Ms. Hartford,

I am pleased that our project has been chosen for funding under contract DE-FG36-94GO14292. The purpose of this letter is to request authorization for pre-award spending privileges from the DOE Golden Field Office. Personnel are available to initiate work on the project. We wish to proceed with the acquisition of drill cuttings and well logs from injection wells drilled at Coso and The Geysers. We will use the material to evaluate and predict the effects of injecting water into heated rocks.

Sincerely yours,

Joseph Moore

Ms. Mary Hartford, Contracting Officer,
DOE Golden Field Office

Dear Ms. Hartford,

I am pleased that our project has been chosen for funding under contract DE-FG36-94GO14298. The purpose of this letter is to request authorization for pre-award spending privileges from the DOE Golden Field Office. Personnel are available to initiate work on the project. We wish to proceed with data acquisition and compilation. Existing well logs and the available geologic, geochemical and geophysical investigations will provide considerable information on the subsurface characteristics of the Glass Mountain thermal area. The results of this compilation will be used to develop an initial 3-dimensional structural model of Glass Mountain and to select the most appropriate wells for further detailed study.

Sincerely yours,

Joseph Moore
