GRC Geothermal Research Library

Available Online Starting January 10, 2005

PLEASE READ ENTIRE EMAIL!

2005 Member Joe Moore

Member ID # 15140

GRC Password 4a49c06c

The Geothermal Resources Council (GRC) is proud to announce a new and unique online service – the GRC Geothermal Research Library. This important innovation by the GRC will be available starting Monday, January 10.

For GRC members, the Geothermal Research Library provides instant, **free** access to over 3,000 technical articles produced in the GRC *Transactions* and *Special Reports*.

With your Member ID and Password (above, under your name), you can access the GRC Geothermal Research Library via the Internet, search the new database, view a preview page, and download pdf files of any GRC-published paper and/or articles of interest.

To sample and use this service, go to:

<http://www.geothermal.org/databases.html>

If you choose to do so when you first enter the system, you can change your initial Password to one of your choice, with 8 characters, alpha or numeric (not case-sensitive). You can change your Password at any time.

We sincerely hope this service is useful to you, and would like to hear your comments. Please contact Estela Smith, GRC Office Manager and Librarian, by email at: grclib@geothermal.org. Phone: (530) 758-2360.
