

**INTER-OFFICE MEMORANDUM**

SUBJECT: Burning Stone 1981 Shallow Drill Holes

DATE: March 2, 1981

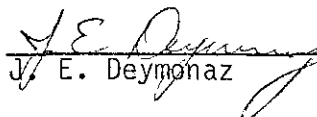

TO: W. E. Merrill, H. D. Pilkington ✓

FROM: J. E. Deymonaz

On February 26, 1981, Mark Avery and I flagged six proposed shallow  $\Delta T$  sites. West Carpenter with AERC accompanied us to perform the archeological inspection. Due to snow cover, only two sites (821-30 and 821-31) were cleared. The remaining four sites will be field checked during the first week in March.

Several of the sites were moved from the locations on the NOI base map. A summary of the changes is attached.

The archeologist has instructions to move the sites along the road if he finds any artifacts of significance, so additional changes in hole locations are possible.
