March 15, 1977

Mr. Harry J. Olson  
AMAX Exploration, Inc.  
4704 Harlan Street  
Denver, Colorado 80212

Dear Harry:

Enclosed is an updated land status map for the Bruneau-Grand View, Idaho area, and the temperature gradient data from the shallow wells drilled by Earth Power late last year.

Our current property position is outlined in yellow, and the Earth Power holes are outlined in pink. While the competition's acreage is not listed, there is some acreage to the south which is available and for which we have considered putting in applications. We can discuss this at some later date.

Best regards,

Ronald C. Barr  
President
